

Rumus Nilai Akhir

$$\text{Nilai Akhir} = (\text{Kehadiran} \times 20\%) + (\text{UTS} \times 30\%) + (\text{UAS} \times 50\%)$$

Contoh:

- Kehadiran = 90
- UTS = 80
- UAS = 85

Maka:

$$\begin{aligned} & (90 \times 0,20) + (80 \times 0,30) + (85 \times 0,50) \\ &= 18 + 24 + 42,5 \\ &= \mathbf{84,5} \end{aligned}$$

Jadi **Nilai Akhir = 84,50**
